**LETTER OF TRANSMITTAL**

**OFFICE OF PUBLIC SERVICE COMMISSION**

*To His Excellency, James B. Edwards, Governor of South Carolina:*

**Sir:**

We have the honor to transmit herewith the Ninety-Eighth Annual Report of the Public Service Commission of South Carolina for the year ending June 30, 1976.

Yours respectfully,

**RUDOLPH MITCHELL, Chairman**

**GUY BUTLER, Vice-Chairman**

**ABNEY A. SMITH**

**FRED A. FULLER, JR.**

**J. LEWIS MOSS**

**J. HENRY STUCKEY**

**HENRY G. YONCE**

**Commissioners**

**JAMES H. STILL**

**Executive Director**

## ANNUAL REPORT OF THE PUBLIC SERVICE COMMISSION OF SOUTH CAROLINA

*To the General Assembly of South Carolina:*

The Public Service Commission has the honor to respectfully submit for your consideration this its Ninety-Eighth Annual Report.

Below is the personnel of the present Commission and the Counties comprising the seven districts:

### *First District*

Abney A. Smith ..... Charleston, S. C.  
Berkeley, Charleston, Clarendon, Colleton, Dorchester

### *Second District*

Rudolph Mitchell, Chairman ..... Saluda, S. C.  
Aiken, Allendale, Bamberg, Barnwell, Beaufort, Edgefield, Hampton, Jasper, Saluda

### *Third District*

Guy Butler, Vice-Chairman ..... Greenwood, S. C.  
Abbeville, Anderson, Greenwood, McCormick, Newberry, Oconee, Pickens

### *Fourth District*

Fred A. Fuller, Jr. .... Greenville, S. C.  
Greenville, Laurens, Spartanburg, Union

### *Fifth District*

J. Lewis Moss ..... York, S. C.  
Cherokee, Chester, Chesterfield, Fairfield, Kershaw, Lancaster, York

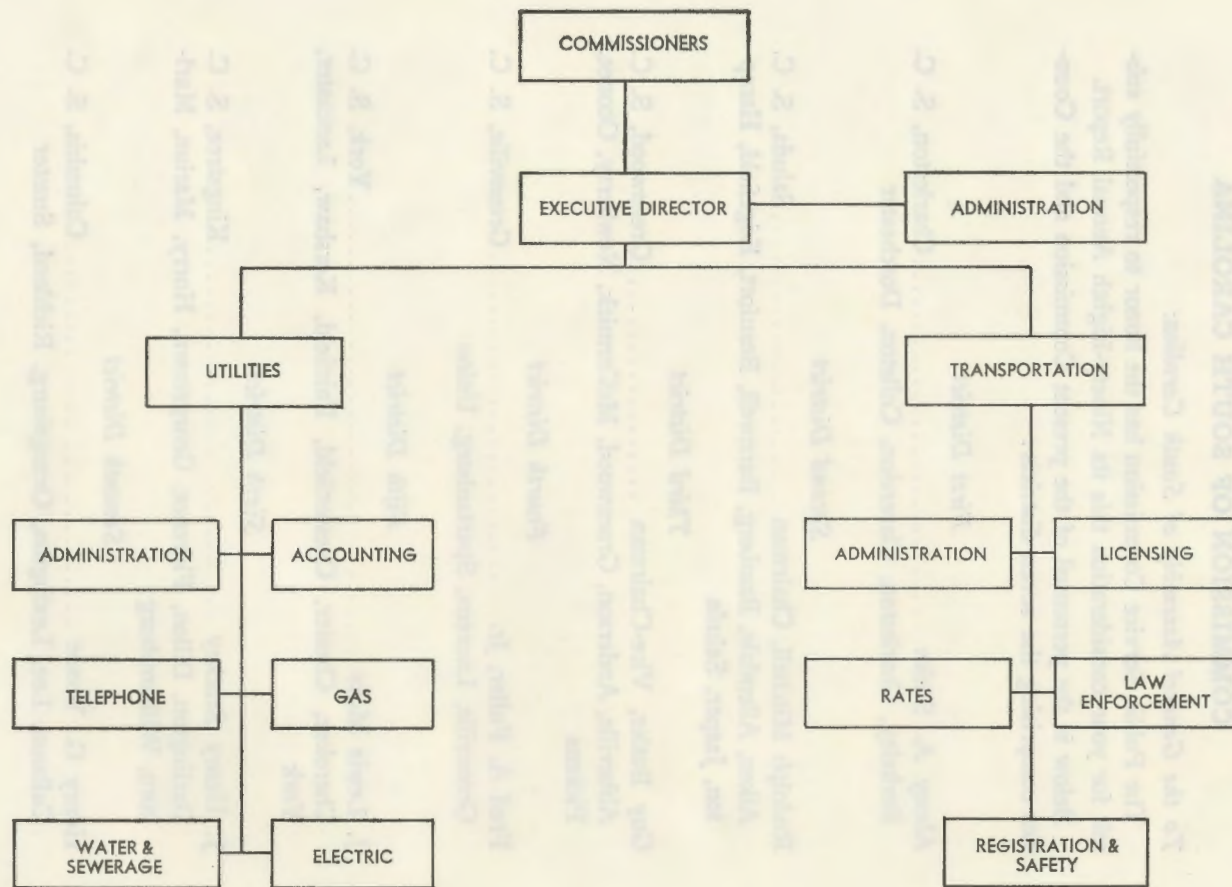

### *Sixth District*

J. Henry Stuckey ..... Kingstree, S. C.  
Darlington, Dillon, Florence, Georgetown, Horry, Marion, Marlboro, Williamsburg

### *Seventh District*

Henry G. Yonce ..... Columbia, S. C.  
Calhoun, Lee, Lexington, Orangeburg, Richland, Sumter

## TABLE OF CONTENTS

## SUMMARY OF EXPENDITURES

### A. EXPENDITURES

I. Commissioners .....	\$ 277,292
II. Administration .....	246,264
III. Utilities .....	560,840
IV. Transportation .....	824,792
V. Employer Contributions .....	217,500
<hr/>	
GRAND TOTAL (PUBLIC SERVICE COMMISSION) .....	<u>\$2,126,688</u>

### B. SOURCE OF FUNDS

I. State Appropriations:	
A. Balance from Prior Year .....	\$ 74,149
B. General Appropriation Act .....	1,927,031
C. Less	
Budget and Control Board Reduction Lapsed .....	-72,450
Carried Forward .....	-61,362
<hr/>	
Total State Appropriation .....	\$1,867,368
II. Departmental Revenue:	
A. Other Funds .....	259,320
<hr/>	
TOTAL FUNDS .....	\$2,126,688

Utility regulation in South Carolina had its beginning with the passage of an Act by the 1878 General Assembly, creating a Railroad Commission for the purpose of regulating railroads operating within the State. The first Commissioner was appointed December 24, 1878, by the then Governor Wade Hampton.

The General Assembly in 1910 established a Public Service Commission, empowering it with the authority to "fix and establish in all cities of this State rates and charges for the supply of water, gas or electricity furnished by any person, firm or corporation to such cities, the inhabitants thereof, and to prescribe penalties."

The 1922 General Assembly combined the two three-man commissions and added one additional Commissioner to form the present seven-man Commission. The name was changed in 1934 to The Public Service Commission.

The present Commission is elected by the Joint Assembly for a term of four years, one from each of the seven Commission Districts.

Authority vested in this body by Statute is to:

1. Regulate and supervise the privately-owned electric utilities as to their rates, charges, services, facilities, practices, accounting procedures, the purchase, sale or lease of utility property and the issuance of securities, as well as administer the Rural Electric Co-operative Act pertaining to territorial boundaries and also administer the Utility Facility Siting and Environmental Protection Act.

2. Approve rates and supervise services of all privately and publicly-owned telephone and telegraph companies as well as radio common carrier companies within the State.

3. Regulate rates and charges, services, facilities, practices and accounting procedures of all intrastate privately-owned gas, water and sewerage companies, and administer the Gas Safety Act enacted by the 1970 General Assembly.

4. Supervise and regulate for-hire motor carriers of persons and property as to authorities, rates, services, charges, schedules, insurance, safety, practices and facilities. Consider applications for Certificates of Public Convenience and Necessity, revoke and suspend same for cause. Issue drivers' permits. The Registration and Safety Act, as passed by the 1970 General Assembly, is also administered by this agency. Enforcement of the rules and regulations of the Transportation Division by uniformed Inspectors in marked patrol cars throughout the State.

During the past fiscal year, the Transportation Division dispensed license tags to 9,030 operating units varying in price from \$7.50 to \$125.00 each, according to payload and issued 15,726 drivers' permits. The various fees assessed produced a revenue of \$1,544,788.

As of June 30, 1976, fifty-nine electric, gas, telephone, telegraph, and radio common carrier utilities were operating within the State with a total plant investment of 3.33 Billion Dollars generating gross revenues of 1.9 Million Dollars. The 175 water and sewerage companies operating within the State generated 3.1 Million Dollars of gross revenue.

The monies appropriated for these functions are obtained as follows:

Electric, gas, telephone, telegraph, radio common carrier, water and sewerage companies are assessed on a gross revenue basis for the operation of the Administration and Utilities Divisions. The funds for the operation of the Transportation Division are deducted from the fees collected from the sale of licenses and the assessment

of railroads. The remainder is deposited with the State Treasurer for distribution to the cities and towns, which amounted to \$881,856.

Revenues from the registration of trucks and the sale of identification stickers are used to defray operating expenses appropriated for the administration of the Registration and Safety Act. Any remaining funds are deposited with the State Treasurer.

From the tremendous growth of industry in the State in the past several years, coupled with the expanding economy, as evidenced by the above figures, conservative projections indicate that utility installations will more than double within the next ten years. During the past fiscal year, the Commission processed seven hundred and sixty-two (762) applications; hearings were held thereon when necessary, and Orders issued.

### **UTILITIES DIVISION**

The function of the Utilities Division of The Public Service Commission is to perform the necessary duties related to the regulation of utilities under the jurisdiction of the Commission. The administrative staff plans, coordinates, directs and supervises the work of its five departments as shown below.

- I. Accounting Department
- II. Electric Department
- III. Gas Department
- IV. Telephone and Telegraph Department
- V. Water and Sewerage Department

The activities of this Division for the fiscal year 1975-76, affecting the various utility groups, are summarized by each Department on the following pages of this report. Two hundred and fifty-five Orders were issued through this Division during the fiscal year, and public hearings were held in connection with one hundred twenty of these.

### **GAS DEPARTMENT**

There are five private corporation natural gas utilities serving customers in South Carolina. The rates and services of these utilities are subject to jurisdiction of the Public Service Commission. The natural gas utilities and the communities they serve are listed in the tables included in this report.

Natural gas brought into South Carolina is produced principally in the gas fields of Louisiana and Texas including the offshore areas in the Gulf of Mexico. The gas is transported to South Carolina

by two interstate pipeline companies: the Transcontinental Gas Pipeline Company and the Southern Natural Gas Company. Transcontinental's pipeline crosses the State in the Northwest Corner passing just south of Anderson and Spartanburg, South Carolina, while Southern's pipeline terminates at a point near Aiken, South Carolina. All natural gas consumed in South Carolina is furnished by these two interstate pipelines which furnished gas to natural gas authorities and municipally owned gas utilities as well as the privately owned utilities.

The Federal Power Commission has jurisdiction over rates and services of interstate pipeline companies and the price of natural gas sold by producers to interstate pipelines. These price fluctuations have a direct bearing on the cost of natural gas to the ultimate consumer in South Carolina. During the past year, the Public Service Commission has participated in several proceedings before the Federal Power Commission to protect the interests of the people and the gas utilities in South Carolina.

The Commission received a number of complaints regarding services and charges from customers of the gas utilities. Each inquiry was investigated and handled informally without necessity of a special hearing.

Many communities in South Carolina are receiving natural gas service through facilities owned by municipalities or gas authorities over which the Commission has no rate or service jurisdiction. However, the South Carolina Gas Safety Act of 1970 vested the Commission with pipeline safety jurisdiction over all gas system operators not subject to Federal Power Commission jurisdiction. Therefore, pipeline safety jurisdiction includes public utilities, municipalities, natural gas authorities, certain public housing authorities and others who purchase natural gas through a master meter for subsequent distribution to individual consumers. As of June 30, 1975, there were 40 such operators.

During Calendar Year, 1975, representatives of the Commission made 324 inspections of natural gas systems to ensure compliance with the South Carolina Gas Safety Act and the Minimum Federal Safety Standards for Natural Gas Pipelines. Ninety-eight violations were found during these visits and as of December 31, 1975, the Commission Staff verified compliance covering eighty-one of these violations. The remaining violations necessitate continued monitoring to substantiate that they are corrected and brought into compliance with the Pipeline Safety Standards.

As indicated by the accompanying tables, the demand for natural gas in South Carolina has resulted in sales growth in recent years, but due to the present dwindling supplies, this growth is being adversely affected. Its characteristics as an efficient and pollution-free fuel have created a nationwide demand of such proportions that our existing domestic supply cannot meet the needs. Most gas utilities have been forced to curtail expansion of their residential, industrial, and commercial "firm gas" market. Some limitations have also been placed on segments of the industrial "interruptible gas" market. During the fiscal year covered in this report, the Commission held extensive hearings and conferences concerning the increasing curtailments of natural gas to our utilities.

All five private gas utilities are operating under the provisions of curtailment plans designed to allocate gas on the basis of priority of service established by such factors as efficiency of use, safety considerations, consumer reliance, and alternate fuel availability.

The dwindling supplies have forced the utilities to construct additional liquefied petroleum gas and liquefied natural gas peaking facilities to meet customer demands.

Agencies of the Federal Government and State Commission have taken actions designed to increase exploration for new gas reserves within the continental United States and offshore areas. In our State, two Companies have been granted Commission approval to engage in exploration activities designed to increase the supply of gas to the Company's System.

Two factors showing the pace of activity by natural gas utilities are the average number of customers and the gross plant investment. The growth in total customers served by each privately owned gas utility is shown by one of the accompanying tables. The total of natural gas customers grew from 191,446 in 1971 to 224,011 in 1975 for an increase of 17% over the five years.

No hearings for increases in rates were held during the fiscal year covered in this report. However, rates were adjusted in accordance with approved purchased gas adjustment clauses in the tariffs. These fluctuations resulted from changes in rates of interstate pipeline companies who supply gas to South Carolina. Some of these rate changes were retroactive decreases which resulted in refunds being passed to the customer through billing credits.

## WATER AND SEWERAGE DEPARTMENT

The majority of water and sewerage utilities operating in the State of South Carolina are owned and operated by municipalities and public water and sewer districts which are exempt, by state statute, from jurisdiction of the Public Service Commission. The cities of Anderson, St. George, and Walterboro are provided water service by privately owned utilities and therefore are regulated by the Public Service Commission.

The number of water systems increased by a total of 15, while the number of sewerage systems increased by a total of 19 during the past fiscal year. This increase in systems brings the total to 437 water and sewerage systems operating under the jurisdiction of the Public Service Commission. Efforts to improve efficiency of each company has brought consolidation of many of the smaller companies. However, because the increase in the number of new companies is greater than the consolidation into larger companies, the total number of companies operating in South Carolina as of June 30, 1975, has increased to 177.

There were 19 new water or sewerage utilities granted certificates of Public Convenience and Necessity during the fiscal year and 4 water or sewerage utilities that were granted certificated areas under formally organized corporations.

More stringent demands by state and federal agencies, higher operating and maintenance costs, wages and supplies caused 37 water and sewerage companies, operating in this state, to apply to the Commission for authority to increase their rates and charges for water and sewerage service.

As prescribed by law and after proper advertisement, Public Hearings were held on each application for adjustments in water and sewerage rates and charges.

The problems of water and sewerage utilities continue to be problems for the Public Service Commission. The Public Service Commission received a substantial number of customer complaints during the fiscal year. These complaints fell into one of two categories, either service or billing; each complaint was investigated and settled informally, or if necessary, resolved through Public Hearings.

Prior to issuing a Certificate of Public Convenience and Necessity to a water or sewerage utility, the Commission, among other things, requires a performance bond in accordance with Section 58-149 of the 1962 Code of Laws of South Carolina as amended, complete cost and rate data, approval of adequate design, and supply potential, plat of proposed area to be served and copy of engineering plans and specifications.

## TELEPHONE AND TELEGRAPH DEPARTMENT

The Telephone and Telegraph Department of the Utilities Division is responsible for the work necessary in the regulation of rates and services pertaining to 32 telephone utilities, one telegraph utility, as well as 15 radio common carrier companies. The Staff of this department investigates, and makes every effort to resolve all complaints involving rates and service, territorial disputes and requests for boundary changes.

Field Inspections of telephone plant in use and under construction are made. When construction is completed, tests and other observations are made to determine the quality and adequacy of service. The staff also maintains an undated file on all tariffs, territorial maps, and other pertinent data. The exhibits and materials submitted with rate applications are thoroughly reviewed before being introduced at a hearing.

During the fiscal year, the Telephone and Telegraph Department processed in excess of 275 customer complaints. The telephone subscribers of today expect better service without delays, failures, or inaccurate billing. Due to these and other reasons, the staff of the Telephone Department performed tests in twenty (20) central offices during the year to determine the condition of the equipment and grade of service being rendered. The results of all tests performed by this staff were reported to the company management, in hopes that it would provide another tool for their use in improving telephone service in South Carolina.

During the past year, most telephone utilities continued to make large investments to improve their outside plant, central office, and toll equipment in an endeavor to cope with the ever expanding telephone industry.

The Commission held 25 formal hearings involving telephone, radio common carrier, territory, and merger matters during the year and all interested parties were given a chance to be heard. A decision was rendered on all 25 hearings. In addition, approximately 450 tariff sheets covering new service or change in language were reviewed by the staff and approved by the Commission without formal hearings.

We are showing below some of the more notable Telephone Utilities accomplishments which occurred during the period of July 1, 1975, through June 30, 1976.

Southern Bell Telephone and Telegraph Company started or completed the following:

Construction started on a building to house a new No. 2 ESS which will replace the 355-A equipment in the Chapin and Little Mountain exchanges.

Construction began on the Wade Hampton TSPS building which will house the first TSPS operator unit in Greenville, S. C.

Installation began on the second addition to the Senate Street No. 1 ESS which will replace the remaining step-by-step equipment in downtown Columbia.

The Anderson-Abbeville Highway No. 2 ESS replacing step-by-step equipment was placed in service.

Installation of the second TSPS operator unit in Columbia began in the new Dentsville TSPS building.

Installation of the Chapin-Little Mountain No. 2 ESS began.

Educational Television during the school year ending June 15, 1976 was as follows:

Public Schools .....	246
School District Offices .....	17
Higher Education .....	22
Technical Education Centers .....	18
Hospitals .....	23
Police Departments .....	12
Miscellaneous .....	20
Total .....	358

General Telephone Company of the Southeast reported the following:

Direct Distance Dialing was placed in service in their Ehrhardt Exchange during June of 1976. Effective with this installation, all GTSE exchanges in South Carolina have DDD.

Automatic Number Identification was installed in Walterboro during December of 1975. With this conversion, 28 of the 33 GTSE central offices in South Carolina and 96.6 percent of all telephones served have ANI.

A traffic service position system or "0+ dialing" was provided to Walterboro customers during December of 1975 in conjunction with installation of ANI.

New air traffic control systems were installed at Shaw and Myrtle Beach Air Force Bases.

Equipment for testing local subscriber lines at remote exchanges was installed in Sumter, Waltham, Abbeville, Laurens, and Myrtle Beach.

A new central office building has been constructed in McCormick to accommodate a new electronic common control central office which is in the process of being installed.

A computerized central office maintenance program was implemented early in 1976. This program should reduce blockage of local calls due to equipment failures and reduce maintenance expenses for the Company.

### ELECTRIC DEPARTMENT

The Electric Department is responsible for providing the Commission with data and information necessary for the regulation of the privately-owned Electric Utilities operating in South Carolina. The Commission requires the Electric Utilities under its jurisdiction to provide adequate service at reasonable rates that provide the Utilities with not more than a reasonable return on the fair values of properties devoted to the public service.

The Electric Department also handles service and high bill complaints and during the fiscal year 277 formal complaints were investigated. Numerous other complaints and requests for information were received over the telephone and were handled without a formal investigation.

During the 1975-76 Fiscal year the several Electric Utilities under jurisdiction of this Commission continued to improve their systems to make more and better service available to the customers on their lines.

Each of the three large electric utilities are planning and building new generating plants, transmission and distribution lines so that adequate electric power will always be available for present customers and any others that may locate in this State.

South Carolina customers are receiving some power from the Clark Hill Project and Hartwell Project through transmission lines of South Carolina Public Service Authority, Duke Power Company and South Carolina Electric and Gas Company.

The major utilities operating in South Carolina as well as neighboring utilities in Georgia and North Carolina are connected by numerous

high voltage transmission lines and, in case of emergency, power is transmitted between the interconnected companies affording the ultimate consumer a better and more continuous supply of power.

The VACAR Group of the Southeastern Electric Reliability Council is a group of electric utilities operating in Virginia, North Carolina and South Carolina. The Reliability Council, Regional and National, were formed to increase the reliability of the bulk electric power supply of the National and the several Area Councils.

Carolina Power and Light Company, Duke Power Company, South Carolina Electric and Gas Company, South Carolina Public Service Authority, Virginia Electric and Power Company and several smaller utilities are in the VACAR Group and these companies exchange information on planning, construction, system loads and other matters affecting the bulk power supply of this area.

The South Carolina residential electric consumer, after having enjoyed continually decreasing costs, has now begun to feel the effects of inflation. On account of the rapidly increasing costs of money, fuel and other items that go into the cost of providing electric service, the Commission has granted the electric utilities under its supervision increases in rates in order that the companies can continue to provide adequate electric service. In spite of these increases, the average South Carolina residential consumer pays an average of 3.26 cents per KWH compared to the national average rate of 3.21 cents per KWH.

A chart has been prepared comparing the residential electric consumption and the average price paid by the South Carolina consumers with the average consumption and average price paid by the average United States Consumer. This chart is printed on one of the following pages.

It is believed that there is no power shortage in South Carolina, and further that the organizations in South Carolina that generate and sell electric service will provide adequate power at reasonable rates for the present and future needs of this State. In fact, at this time, there are new generating facilities under construction by both privately-owned and publicly-owned utilities within the State.

It is interesting to note that generating stations constructed in recent years by South Carolina Utilities have been among the most efficient in the United States and recently Duke Power Company was reported to have the second most efficient generating system in this Country, as well as the most efficient generating unit.

## RATES

The downward trend in electric rates enjoyed by the average residential electric consumer in recent years has leveled off. The rapidly rising costs of all things necessary in providing good service has required rate increases in order to protect the financial condition of the several electric companies, so that the companies can continue to finance, at a reasonable rate, the many additions required in providing good service.

During 1975 the 612,753 residential customers in South Carolina served by the privately-owned electric utilities paid \$223,076,356 for 6,835,992,920 kilowatt-hours. The average South Carolina customer used 11,156 kilowatt-hours during the year, for which he paid a total of \$364.06 at an average rate of 3.26 cents per kilowatt-hour, as compared to the average customer throughout the United States, who used 8,175 kilowatt-hours for which he paid a total of \$262.42 at an average rate of 3.21 cents per kilowatt-hour during 1975.

The average rate paid in South Carolina is slightly higher than the average rate paid by all residential customers in the United States, including those customers in the Tennessee Valley and other areas where publicly-owned power is provided. In South Carolina, if Santee-Cooper residential statistics were included with those of the privately-owned utilities, the South Carolina average rate probably would be lower.

There are 2,694 large industrial customers of the privately-owned utilities in South Carolina who purchased 11,712,549,086 kilowatt-hours at an average rate of 1.8 cents per kilowatt hour, which is below the power rates in a large part of this nation.

Industries now located within South Carolina and other industries desiring reasonable electric power rates will find that electric power can be secured throughout practically the entire State at very reasonable rates.

## RURAL ELECTRIFICATION

The growth of rural electrification in South Carolina has been very rapid. There are now nearly half a million rural and suburban electric customers in South Carolina receiving central station service; that is, they are served by the same generating stations that serve the urban customers. It is believed that practically every rural and suburban home in South Carolina that desires electric service now has or can secure electric service. Of course there are isolated cases where several miles of line would be required to serve a single home far

removed from other homes, or even a fishing shack on a river, and where the cost of providing service is greatly out of proportion to the use to be made of electric service.

The big job left to be done is in connecting those customers living on present lines, who for various reasons, have not secured electric service and those new customers who build new homes adjacent to present lines and in increasing the capacity of present lines to take care of the greatly increased loads due to the use of more and more time saving and money-saving convenient electric appliances.

The Commission and staff have always worked with all potential electric consumers and have helped thousands of them to secure central station electric service.

### **RURAL TERRITORY ACT**

The General Assembly passed the "Rural Territory Act" in 1969 and the Commission, pursuant to the Act has required all "Electric Suppliers" to file maps with the Commission showing rural electric lines in existence as of July 1, 1969. As of July 1, 1971, mylar maps of all counties in South Carolina had been filed with the Commission and negotiations between the several "Electric Suppliers" was begun.

Territory in practically all of South Carolina has been agreed upon by the "Electric Suppliers", and Orders approving the allocation of territory have been issued by the Commission.

### **SITING ACT**

The 1971 General Assembly passed an Act to give the Commission authority over "UTILITY FACILITY SITING AND ENVIRONMENTAL PROTECTION" effective January 1, 1972. The Commission has issued one Certificate under this Act for the construction and operation of the Cherokee Nuclear Generating Plant in Cherokee County by Duke Power Company. Other Applications have been received, and Hearings have been set to consider these Applications.

The larger utilities are now advising the Commission of planned construction within the next ten years and of probable construction within the next twenty years.

Engineers in the Electric Department perform such other duties as assigned by the Commission.

A number of statistical tables and charts are included in this report to show the growth and health of the electrical utilities under jurisdiction of this Commission.

## ACCOUNTING DEPARTMENT

The Accounting Department consists of eight accountants who report to an Accounting Manager.

The primary function of the Accounting Department is to audit a utility company prior to a rate increase hearing before the Commission. A rate case audit is different from an audit by the Company's CPA Firm in that Accounting principles and procedures must be based upon regulatory law. Rate case exhibits must be based upon a "normal" year. Adjustments need to be made to the test year in order to arrive at a more meaningful basis for the Commissioners to decide upon an equitable rate of return on company investments. Company exhibits are tested by checking procedures and by sampling techniques. Company adjustments to the test year must be closely checked for propriety. The Staff makes additional adjustments to arrive at a "normal" year. Other exhibits are prepared by the Staff to point out strengths and weaknesses of the Company. After the audit and when adjustments and exhibits are prepared, a formal report is issued by the Accounting Staff for the hearing.

The Accounting Staff has incurred the additional responsibility of auditing the operating Fossil Fuel Clause. The audit of the fuel clauses requires sampling of invoices and checking procedures throughout the year.

Conferences and schools were attended by the Staff to maintain professional expertise, share problems and keep current on new developments.

The Accounting Staff prepares statistical data at various times for other states, Federal Power Commission, National Association of Regulatory Utility Commissioners, and other interested parties.

During the year, the Accounting Staff has been increasingly called to testify for hearings before the Commission.

## RATE CASES DURING 1975-1976

1. Alpine Utilities, Inc.
- \*2. Bluffton Telephone Company
3. Briarcliff Estates
4. Carolina Water Service
5. Cedarwood Utilities, Inc.

\*\* Companies received Directory Assistance in addition to Rate Increase.

The Electric utilities are required to have the approval of the Commission on financing with maturity date of more than one year.

The following is a list of the various securities applied for and authority granted for issuance thereof:

**South Carolina Electric & Gas Company  
Columbia, South Carolina**

To issue and sell 1,000,000 shares of Common Stock \$4.50 par value, or a larger number of shares of Common Stock not to exceed one new share for each five shares outstanding of the Company's Common Stock.

To issue and sell not to exceed \$25,000,000 of its First and Refunding Mortgage Bonds, 9 $\frac{3}{8}$ % Series.

To issue and sell another \$50,000,000 of the Company's First and Refunding Mortgage Bonds.

To issue and sell 1,200,000 additional shares of Common Stock \$4.50 par value, or a larger number of shares of Common Stock not to exceed 1,700,000 of the Company's Common Stock should market conditions warrant.

To issue and sell 200,000 shares of 10 $\frac{3}{4}$ % Cumulative Preferred Stock of \$100 par value at a price of \$100 per share.

To issue an additional \$3,769,000 of First and Refunding Mortgage Bonds, 3% Series due April 1, 1980 to satisfy a sinking fund requirement due June 1, 1976.

**Duke Power Company  
Charlotte, North Carolina**

To issue a promissory note in the principal amount of \$506,200, payable in 30 consecutive annual installments of \$52,024.90, including interest at the rate of 9 $\frac{5}{8}$ % per annum on the unpaid balance.

To issue and sell a maximum of 5,000,000 shares of Common Stock, no nominal or par value, the net proceeds to go toward financing the cost of construction of additions to its electric plant.

**Carolina Power and Light Company  
Raleigh, North Carolina**

To issue and sell not to exceed 4,500,000 additional shares of common stock, without, par value.

The Accounting Department has prepared tables showing operating revenues, operating expenses, net operating income, state and local taxes paid, and gross plant in service for South Carolina operations

only, for Electric, Gas, Telephone and Telegraph, Mobile Communications, Water and Sewerage Utilities operating in South Carolina.

The tables are as follows:

TABLE A—Privately Owned Electric Utilities Operating in South Carolina. Selected Statistics for South Carolina only. For the Years Ended December 31, 1972-1975.

TABLE B—Gas Utilities Operating In South Carolina. Selected Statistics for South Carolina only. For the Years Ended December 31, 1972-1975.

TABLE C—Telephone & Telegraph Utilities Operating in South Carolina. Selected Statistics for South Carolina only. For the Years Ended December 31, 1974-1975.

TABLE D—Mobile Communications Utilities in South Carolina. Selected Statistics for South Carolina only. For Fiscal and Calendar Year 1975.

TABLE E—Water Utilities Operating in South Carolina. Selected Statistics for South Carolina only. For Fiscal and Calendar Year 1975.

TABLE F—Sewerage Utilities Operating in South Carolina. Selected Statistics for South Carolina only. For Fiscal and Calendar Year 1975.

**PRIVATELY-OWNED ELECTRIC UTILITIES OPERATING IN SOUTH CAROLINA

## TRANSPORTATION DIVISION

Administration—The duty of this Division is to enforce the Motor Vehicle Carrier Law of the State, Sections 58-1401—58-1501 of the South Carolina Code of Laws, 1962, as amended. The Law provides for the regulation, supervision and control of persons, firms, corporations, etc., operating motor vehicles used in the business of transporting persons or property for compensation over the highways of the State, and imposes license fees to cover the cost of administration.

During the period of this report, eighty (80) hearings were held in connection with motor transportation matters.

In connection with Class E (motor freight service over irregular routes) fifty applications for Certificates were heard, of which twenty-two were granted, eight denied and seven applications dismissed. Twelve applications to amend Class E Certificates were heard, of which eight were granted and four denied. One application to transfer Class E Certificate was heard and granted.

Four applications for Class F (motor freight service under contract) Certificates were heard, of which three were granted and one application was dismissed. Five applications to amend Class F Certificates were heard and granted.

Two applications for Class C (taxi cabs and charter buses) Certificates were heard and granted.

Four applications for Restricted Class A Certificates were heard and were granted. One application to amend Restricted Class A Certificate was heard and granted.

One Rule to Show Cause why Certificates of Public Convenience and Necessity should not be revoked for failure to comply with the Motor Vehicle Carrier Law of South Carolina was issued against seventy-two carriers, resulting as follows: Rules against two Restricted Class A Certificate holders were dismissed and six Certificates were revoked. Rules against one Class C Certificate holder was dismissed, one Certificate was cancelled, and twelve Certificates were revoked. Rules against three Class E Certificates, Restricted to Interstate Commerce Only, were dismissed, three Certificates were cancelled and three Certificates were revoked. Rules against five Class E Certificate holders were dismissed, two Certificates were suspended and sixteen Certificates were revoked. Rules against five Class F Certificate holders were dismissed, three Certificates were suspended, two Certificates were cancelled and twelve Certificates were revoked.

In addition to matters which were disposed of after public hearing, five hundred and fifty-two Orders were issued disposing of motor transportation matters without hearings.

In connection with Class A Carriers (regular route bus); one Class A Certificate was cancelled and one Certificate was amended. Sixteen Restricted Class A Certificates were granted, thirteen Certificates were cancelled, three Certificates were suspended and nine Certificates were amended.

In connection with Class B Carriers (regular route bus irregular schedule); one Certificate was granted, one Certificate was amended and one Certificate was transferred. One Restricted Class B Certificate was amended.

In connection with Class C Carriers; one hundred and thirty-five Certificates were granted, ninety-two Certificates were cancelled, five Certificates were suspended, five Certificates were amended, one application for a Class C Certificate was dismissed and one Petition for Rehearing was denied.

In connection with Class E Carriers; forty-nine Certificates were granted, sixteen Certificates were cancelled, three Certificates were revoked, eight Certificates were amended, twenty Certificates were transferred, twelve Certificates were suspended, twenty-one applications for Class E Certificates were dismissed, six applications to amend Class E Certificates were dismissed, three Petitions for Rehearing were denied, four Petitions for Rehearing on amending Certificates were denied, one stock transfer was approved, one stock transfer was dismissed, two applications for lease of authority were granted and one application for lease of authority was denied. One Restricted Class E Certificate was cancelled. Seventeen Class E Certificates, Restricted to Interstate Commerce Only, were granted, four Certificates were cancelled and two Certificates were transferred.

In connection with Class F Carriers; eighteen Class F Certificates were granted, thirty Certificates were cancelled, six Certificates were suspended, four Certificates were transferred, twenty-six Certificates were amended, six applications to amend Class F Certificates were dismissed and three applications for Class F Certificates were dismissed. One Class F Certificate, Restricted to Interstate Commerce Only, was granted and one Certificate was suspended.

Rules 56, 58 and 60 (insurance limits) were revised; and, the Rules and Regulations of the South Carolina Public Service Commission pertaining to Motor Carriers were promulgated, to become effective July 1, 1976.

The Transportation Division has jurisdiction over city bus transportation where the bus service supersedes electric street railway transportation. This gives the Commission jurisdiction over city bus transportation in Anderson, Charleston, Columbia, Greenville and Spartanburg, S. C.

Gasoline and diesel buses were operated in South Carolina by the Duke Power Company at Anderson and Spartanburg, by the Greenville City Coach Lines, Inc., at Greenville, and by the South Carolina Electric and Gas Company at Charleston and Columbia, S. C.

During the year 1975, the above named bus companies transported 11,460,619 passengers as compared to 12,795,338 in 1974. This was a decrease of 1,334,719 passengers in 1975 compared to 1974. (The 1,334,719 shows a 10% drop in total passengers for 1975).

During the fiscal year 1975-76, a number of changes were made in bus routes and schedules in order to make the most economical use of the facilities of various bus transportation companies operating in this State.

With the growth of the motor carrier industry in this State, together with the better enforcement of the Motor Carrier Law made possible by increased enforcement facilities, the work of this Division has rapidly increased, as evidenced by revenue receipts as shown in the following, through the fiscal year 1962-1963. However, beginning in 1962 the General Assembly for three successive years, passed legislation which reduced license fees for Class D, E, and F Certificate holders by twenty-five per cent per year. This reduction is shown in the revenue as collected since that time along with a portion of the motor vehicle registration fees collected by the South Carolina Tax Commission and credited to the Motor Transportation Fund beginning with the fiscal year 1962-1963.

Cost of Administration .....	626,630.57	
Balance for Distribution to Cities and Towns .....	881,707.97	
<b>Total .....</b>		<b>\$1,508,338.54</b>

### APPEARANCE AND CASH BOND ACCOUNT:

On hand July 1, 1975 .....	3,450.00	
Collected .....	5,150.00	
<b>Total .....</b>	<b>8,600.00</b>	
Less Bonds Refunded .....	5,700.00	
<b>Balance on hand June 30, 1976 .....</b>		<b>2,900.00</b>

## ENFORCEMENT DEPARTMENT

The enforcement of the Motor Vehicle Carrier Law of the State, Sections 58-1401—58-1501 of the South Carolina Code of Laws, 1962, as amended, is carried out by the staff of inspectors stationed throughout the State. This force of inspectors made 3,011 cases with a total amount of money collected as fines in the amount of \$87,470.00.

## AUDIT DEPARTMENT

On July 1, 1975 an Audit Department was formed for the Transportation Division, consisting of two auditors.

Between two and three months were spent setting up the Department and audit procedures for different types of audits that were expected to be performed.

During the fiscal year ending June 30, 1976 the following audits were performed:

1. Total audits .....	57
2. General audits (Rates & Scope of Operations) .....	38
3. Audits in regard to rate increase applied for .....	19
4. Number of tickets issued for rate and scope of operation violations .....	32

This Department is also responsible for Annual Reports that are due each year by March 31. Twenty-five tickets were issued for not filing Annual Reports on time.

## ANNUAL REPORT FOR RAILS AND TARIFFS DEPARTMENT

The South Carolina Railroads are assessed for the support of the Rails and Tariffs Department. For the Fiscal Year Ending June, 1976, the Railroads were assessed \$37,812.

The Rails and Tariffs Department handled a total of 318 Applications; 155 Motor Carrier related applications and 163 Rail related applications, pertaining to various aspects of the transportation field. All general increase applications were handled thru public hearings.

This Department is responsible for all abandonment of stations and track. During the fiscal year 1975, the South Carolina Railroads abandon .99 miles of track. There were some stations changes which were included in the Mobile Agency Concepts. The mobile agencies operating within The State of South Carolina has allowed substantial savings to the Railroads due to the economic feasibility of the concept and the improved service thereof.

## RAILWAY OPERATING REVENUES, OPERATING EXPENSES AND OPERATING RATIOS

For Year Ending December 31, 1975

Reporting Company	Operating Revenue	Operating Expenses	Operating Ratio
Clinchfield Railroad .....	\$ 44,695,000	\$ 29,155,000	65.23
Columbia, Newberry & Laurens Railroad .....	2,653,994	1,254,302	47.26
Greenville & Northern Railway .....	246,100	273,032	110.94
Hampton & Branchville Railroad .....	146,651	193,549	131.98
Lancaster & Chester Railroad .....	446,698	440,685	98.65

## REGISTRATION AND SAFETY DEPARTMENT

### Registration of Certified and Exempt Commodity Interstate Motor Carriers (Public Law 89-170— Section 58-1444)

On April 16, 1971, the South Carolina Motor Vehicle Carrier Law was amended by adding Section 58-1444 governing the operation of interstate carriers certificated by the Interstate Commerce Commission and exempt commodity carriers. Section 58-1444 authorized the South Carolina Public Service Commission to promulgate rules and regulations pursuant to this Act. The Rules promulgated complied with the standards as recommended and approved by the National Association of Regulatory Utility Commissioners and the Interstate Commerce Commission.

Carriers coming under this category are charged a registration fee of \$25.00, any amendment to the authority as registered \$10.00. Mobile Home Transporters are charged one-half the amendment fee or \$5.00. All trucks operating into or through South Carolina under Section 58-1444 must purchase an identification stamp at \$1.00 per truck.

Under the same Section, all exempt commodity carriers operating into or through South Carolina must file a letter with this Commission setting forth the exempt commodities to be transported. These fees are identical to those of Certificated carriers. All funds derived from such fees and charges are to be retained by the Commission and expended by it to control and police illegal transportation and promote safety on the highway.

During the period of July 1, 1975, through June 30, 1976, 174 Certificated carriers registered their authority with this Commission. Prior registrants were 1,693 making a total of 1,867 registered Certificated carriers. There were 709 registrants of additional authority with this Commission. For the same period 1,714 Exempt Carriers registered their letters of exemption. Prior registrants were 6,570 making a total of 8,284 registered Exempt carriers.

Balance From Previous Years .....	\$208,192.00
Revenues From Certificated Carriers ....	\$190,027.00
Revenues From Exempt Carriers .....	65,297.00
Total Revenue from 7-1-75 through 6-30-76 .....	255,324.00
Total .....	<u>\$463,516.00</u>
Expenditures this Division .....	\$244,495.00
Balance carried forward to 1976-1977 .....	\$219,021.00

The enforcement of this Law and check of all trucks on the road for safety purposes will be done by the Inspectors in the field.
